We Work with You

QUALITY MANAGEMENT SYSTEM

Paramount O&G Consultants (POC) uses its proprietary Quality Management System (QMS) software solution to manage various aspects of your project's quality.

Quality Assurance on a project can be daunting, costly and time consuming adding delays to project delivery if management systems are not setup and managed properly from project startup.

POC QMS software solution can manage the Quality Assurance of your project.

1. WORKPACK MANAGEMENT

Workpacks are an essential part of a project and is of paramount importance to manage it effectively for timely closeout. QMS software provides a platform to setup your workpacks, track its progress and manage closeout.

2. NON CONFORMANCE MANAGEMENT

Non Conformances (NCR) if not managed properly can result in lot of rework having huge cost and schedule impacts. QMS software allows you to manage your Non Conformances within the guidelines of ISO 9001:2008.

3. AUDIT MANAGEMENT

Audits are an important tool to continually improve the operational effectiveness of the project. Audit program needs a proper management system in place to plan and conduct audits, record and report its audit findings and manage audit closeout. QMS software can take the

4. PUNCHLIST MANAGEMENT

Punch listing is a very important step towards Project Completion and Turnover. It's essential that this process is managed correctly otherwise could result in significant costs and can delay project delivery.

burden off your project to manage all these aspects of Audits providing improvements to your projects.

QMS Software provides Punchlist Management functionality in line with industry best practices.

5. REPORTS

QMS software user can easily generate multiple reports in PDF or Excel formats. These reports either could be an Overview or a Detail report as the need may be and could either be saved onto your computer or emailed to desired recipients via this software.

User can also create myriad of custom reports using a selection criteria to review or/and report numerous aspects of project's quality.

6. MDR PREPARATION

Manufacturer Data Record compilation can easily go haywire if your project doesn't have a handle on projects workpacks with respect to projects systems and sub-systems. QMS software lays emphasis on managing clear references between Systems, Sub Systems, Workpacks, Non Conformances and Punchlists that MDR compilation on the project would be a breeze.

7. SEARCH RECORDS

As project ramps up so does the volume of quality records that makes it very hard to find a particular record when you need it the most.

QMS software provides a 'Search' button so user could search any record to review its details and generate a PDF or Excel report of this record.

quality management solutions for delivering quality consistently always

Paramount O&G Consultants provides its proprietary Quality Management System software solution to manage quality.

8. TRAINING

Using new project systems could at times be stressful for your project team. POC can provide QMS software training sessions to the project team at your project's facility to train project personnel on various functionalities of this software system for a clear understanding and operations.

9. CUSTOM SOLUTION

It's perfectly Ok to ask a POC consultant to customise this QMS software as per your project needs. We can hold a requirements gathering session with your project team to record your needs and customise this QMS software.

10. CUSTOMER SUPPORT

POC consultants will be by your side always to provide ongoing QMS software customer support to resolve any queries or concerns.
